CBSE SPOT EVALUATION SCORECARD - Tharun

Scored: 31.5 / 35.0 (90.0%) - VERIFIED_ACTIVE_LEARNING

Q.1 to Q.5: Section A: Objective & Assertion-Reasoning [5 Marks] **5.0 / 5.0**

Student Script: 1.(b) $(a-b)^2=a^2-2ab+b^2$; 2.(c) Pascal; 3.(c) Drip Irrigation; 4.(c) Permanent Settlement; 5.(a) Both A and R are true and R explains A.

Red-Ink Slips: [✓ +5.0] Perfect concept identification in Section A.

Q.6: Factorise by grouping: 15xy - 6x + 5y - 2 [2 Marks] **2.0 / 2.0**

Student Script: = 3x(5y - 2) + 1(5y - 2) = (5y - 2)(3x + 1)

Red-Ink Slips: [✓ +2.0] Clean factorization by grouping.

Q.9: Calculate maximum pressure exerted by wooden block 20x10x5 cm of mass 4 kg [3 Marks] **2.5 / 3.0**

Student Script: F = m*g = 4*10 = 40 N. Min Area = 10cm * 5cm = 0.10 * 0.05 = 0.005 m^2. P = F/A = 40 / 0.005 = 8000.

Red-Ink Slips: [✓ +2.5] Excellent formula application and conversion to meters.
[✗ -0.5 UNIT MISSING] Wrote 8000 without 'Pascals' (Pa). Never omit SI units!

Q.10: Perimeter of pool is 154 m. Length is 2m more than 2b. Find l and b [3 Marks] **3.0 / 3.0**

Student Script: Let b = x m. l = (2x + 2) m. P = 2(l + b) => 154 = 2(2x + 2 + x) => 154 = 2(3x + 2) => 77 = 3x + 2 => 3x = 75 => x = 25 m. Breadth = 25 m, Length = 2(25)+2 = 52 m.

Red-Ink Slips: [✓ +3.0] Flawless step-by-step algebraic proof. Both values boxed with units.

Q.12: Cylindrical storage tank radius 7m, height 3m. Sheet required & cost [5 Marks] **4.5 / 5.0**

Student Script: Total Surface Area = 2*pi*r*(r + h) = 2 * (22/7) * 7 * (7 + 3) = 44 * 10 = 440 m^2. Cost = 440 * 45 = ☐ 19,800.

Red-Ink Slips: [✓ +4.5] Correct formula and arithmetic.
[▲ -0.5] Missing concluding word statement: 'Total sheet required is 440 m^2 and total expenditure is ☐ 19,800'.
